

ADAPT
NORTHERN HERITAGE

Adapt Northern Heritage

Adapting northern cultural heritage to the environmental impacts of climate change and associated natural hazards through community engagement and informed conservation planning

Objective 1

Assessment tool and adaptation guidance

Develop procedures for risks and vulnerabilities assessments and sustainable adaptation planning of historic places and make the procedures accessible through online software

Objective 2

Demonstration case studies

Produce adaptation action plans to demonstrate how the environmental impacts of climate change and associated natural hazards can be integrated into conservation planning

Objective 3

Community network

Create a network for stakeholders concerned with the conservation of northern cultural heritage in the context of a changing climate to contribute, engage, learn and network

Project in details

- June 2017 - May 2020
- 4 Project Partner
- 11 Associated Partner
- 9 case studies
- active in Iceland, Ireland, Norway, Russia, Scotland and Sweden

Snæfellsjökull, Iceland

The archaeological heritage of the Snæfellsjökull National Park in western Iceland is increasingly endangered by rising sea levels as a result of climate change.

The project receives funding from

**Northern Periphery and
Arctic Programme**
2014–2020
